## Profile

I am an energetic web developer with 3+ years of experience building solutions to solve problems in tech startups. I'm also

an enthusiastic, creative and proactive team player. I am known to have a growth mindset and I am ready to pick up any tool or stack as long as the product I intend to work on requires it.

### Areas Of Expertise

I've worked with various languages; JavaScript, PHP and Python. With JavaScript, I write web apps with Vue.js, React, APIs (REST and GraphQL) with Node.js and Mobile apps with Ionic. With Python, I build APIs with the Flask framework (REST and GraphQL). With PHP, I build APIs with Laravel and Lumen and Codelgniter. Other tools I have worked with are PostgreSQL, Redis, Nuxt, Sails.js, and Adonis.js and Docker.

## Employment History

### Fullstack Engineer, Lynerx (Lynerx.com)

📍 Osun, Nigeria

- Developed a delightful FullStack Web application for our SaaS platform using Laravel, MySQL and Redis on the backed along with Vue.js and Axios on the front end with a focus on the simplicity of user experience and high-performance.
- Wrote code according to specifications and standards.
- Worked across disciplines with team members on the design and planning team.
- Engaged with the team in software requirements, design, and reviews.
- Ensured we were bug-free by writing unit and integration tests.
- Deployed the application and performed updates and upgrades to the server with zero downtime deployment.

### Web Developer, Audacity2Lead (audacity2lead.com)

📍 Lagos (Remote)

- Developed Sleek Websites for our clients using PHP, MySQL and and Wordpress with a focus on achieving design requirements and Search Engine Optimization
- Wrote code according to specifications and standards.
- Worked across disciplines with team members on the design and planning team.
- Worked remotely with a dedication to meet deadlines.
- Deployed websites and performed updates and upgrades to the applications on various servers.

### Web Developer (Contractor), Edvant-Edge Africa

📍 Lagos

- Worked with the Internal Designer to ensure responsiveness and functionality
- Worked across disciplines with team members on the design and planning team.
- Engaged with the team in software requirements, design, and reviews.
- Ensured we were bug-free by writing unit and integration tests.
- Deployed the application and performed updates and upgrades to the server with zero downtime deployment.

## Education

### University Of the People, BSc Computer Science

Apr 2019 – Sep 2023 📍 California, USA

### Lagos City Polytechnic, NID Software Engineering

Sep 2017 📍 Lagos

## Internships

### Backend Developer Intern , AMEN CS

📍 Michigan (Remote)

- Worked Remotely as a Backend Developer Intern to build an e-learning application
- Collaborated with Design, Frontend, and Android teams to build APIs as the solo backend developer
- Worked extensively to ensure the security of our applications
- Wrote Tests and made sure every feature was working as expected before deployment
- Worked with Laravel Forge in order to handle the Devops of our platform

### Wordpress Developer Intern, Lanet Systems

📍 Lagos

- Built and handled a lot of client's website using Wordpress
- Ensured the security of client's applications according to OSWAPs rules
- Integrated Payment gateways into Existing websites

### Web Developer Intern, Hotels.ng

- Participated in the Hotels.ng cohort 5 internships (now start.ng)
- Came out amongst the top 4% (72) of interns who scaled through the final phase (Over 4,000+ people began the internship)
- Worked to develop the Vevalert (devalert.me) project in multiple positions as needed (Backend, Front-end, Project Management, and SEO)
- Worked with version control and a Scrum-based approach to ensure project deliverability.
