👤 PROFILE

Energetic Full-stack developer with 4+ years of experience building solutions for tech startups with a knack for writing performance-driven code following test-driven best practices.

Areas Of Expertise

I've worked with various languages; JavaScript, PHP, and Python. With JavaScript, I write elegant web apps with Vue.js, React, APIs (REST and GraphQL) with Node.js, and Mobile apps with React Native and Ionic. With Python, I build APIs with the Flask framework (REST and GraphQL). With PHP, I build APIs with Laravel and Lumen and Codelgniter. Other technologies I have worked with are PostgreSQL, Redis, Nuxt, Sails.js, Adonis.js, and Docker.

📁 EMPLOYMENT HISTORY

Lead Developer at Scantoeat.io, Lagos, Nigeria

February 2021 — Present

- Currently developing a SaaS platform to revolutionize the way people all over the world eat using a test-driven architecture.
- Current development stack is Laravel, Tailwind and a MySQL database with an automated deployment system hosted on Linode.

Contract Developer at Safer Online Gambling Group, UK

January 2020 — April 2021

- Developed the first version of the Bet-protect App using React Native
- Wrote the back-end using Laravel and then NodeJs
- Implemented an AI counseling bot using google's Dialog-flow
- Implemented a peer to peer support group using Firebase
- Implemented Push notifications using Firebase Cloud messaging
- Wrote tests and Implemented CI/CD using PHP unit and Gitlab CI
- Deployed the app to the Test-flight (Ios) and Google-playstore beta program (android)

Back-end Engineer at Lynerx (Lynerx.com), Osun, Nigeria

- Developed a delightful FullStack Web application for our SaaS platform using Laravel, MySQL and Redis on the backed along with Vue.js and Axios on the front end with a focus on the simplicity of user experience and high-performance.
- Wrote code according to specifications and standards.
- Worked across disciplines with team members on the design and planning team.
- Engaged with the team in software requirements, design, and reviews.
- Ensured we were bug-free by writing unit and integration tests.
- Deployed the application and performed updates and upgrades to the server with zero downtime deployment.

Web Developer at Audacity2Lead (audacity2lead.com), Lagos (Remote)

- Developed Sleek Websites for our clients using PHP, MySQL and Wordpress with a focus on achieving design requirements and Search Engine Optimization

- Wrote code according to specifications and standards.
- Worked across disciplines with team members on the design and planning team.
- Worked remotely with a dedication to meet deadlines.
- Deployed websites and performed updates and upgrades to the applications on various servers.

Web Developer (Contractor) at Edvant-Edge Africa, Lagos

- Worked with the Internal Designer to ensure responsiveness and functionality
- Worked across disciplines with team members on the design and planning team.
- Engaged with the team in software requirements, design, and reviews.
- Ensured we were bug-free by writing unit and integration tests.
- Deployed the application and performed updates and upgrades to the server with zero downtime deployment.

EDUCATION

BSc Computer Science, University Of the People (Deferred), California, USA

April 2019 — September 2023

NID Software Engineering - Deferred, Lagos City Polytechnic, Lagos

September 2017

INTERNSHIPS

Backend Developer Intern at AMEN CS, Michigan (Remote)

- Worked Remotely as a Backend Developer Intern to build a tele-conferencing application
- Collaborated with Design, Frontend, and Android teams to build APIs as a backend developer
- Worked extensively to ensure the security of our applications
- Wrote Tests and made sure every feature was working as expected before deployment
- Worked with Laravel Forge in order to handle the Devops of our platform

Wordpress Developer Intern at Lanet Systems, Lagos

- Built and handled a lot of client's website using Wordpress
- Ensured the security of client's applications according to OSWAPs rules
- Integrated Payment gateways into Existing websites

Web Developer Intern at Hotels.ng

- Participated in the Hotels.ng cohort 5 internships (now start.ng)
- Came out among the top 4% (72) of interns who scaled through the final phase (Over 4,000+ people began the internship)
- Worked to develop the Devalert (devalert.me) project in multiple positions as needed (Back-end, Front-end, Project Management, and SEO)
- Worked with version control and a Scrum-based approach to ensure project deliverability.
